Subject: Yucca Mountain EIS

---

At Senator Bryan's request in a newspaper article I am e-mailing you. However CONTRARY to his suggestion I am in FAVOR of the use of Yucca Mountain for the storage of spent nuclear fuel provided studies prove it is suitable. I also feel there is no need to extend the comment period for EIS. As a retired professional engineer I have reviewed and prepared comments on a number of EISs. I typically did this in only a few days while attending to my other duties. The requested extension is just another effort by opponents to delay the project.
